PROJECTS

News App (NEWST)

- Developed a multi-screen news application featuring real-time news feeds, categories, and bookmarks.
- Designed a sophisticated user interface with seamless navigation, custom widgets, and localized content support.
- Integrated with RESTful APIs for live data fetching and utilized Cubit for efficient state management.

Tasks App

- Responsive UI Design supporting multiple screen sizes.
- Dark Mode implementation for enhanced user experience.
- Local Data Storage (Shared Preferences).

Chat App with Firebase

- Built a real-time chat application using Firebase.
- Implemented user authentication, real-time messaging, and notifications.

E-Commerce App

- Developed a Flutter-based e-commerce application using RESTful APIs.
- Implemented product listing, user authentication, and responsive UI.
